Fleuron chair by Constance Guisset for Billiani

Dezeen Showroom: French designer **Constance Guisset** has created the Fleuron chair for Billiani, which is informed by structural reinforcements.

The **Fleuron chair** references structural buttresses that reinforce walls through a grafted pad on the rear of the backrest.

The design counters this industrial reference point by employing soft lines and rounded edges.

The chair is made from a frame, seat and backrest, and is available in ashwood timber finished with wood stain, coloured stain or matt lacquer.
